WARFARE PLATFORMS

THE ROLE OF AI IN WARFARE

If classic computer hacking, spoofing, advanced persistent threats, and related measures gradually lose some of their effectiveness, a new set of challenges is appearing on the horizon.

What it is

What its not

IT IS TYPICALLY
CONCEPTUALIZED AS
STATE-ON-STATE ACTION
EQUIVALANT TO AN
ARMED ATTACK OR USE
OF FORCE IN CYBERSPACE
THAT MAY TRIGGER A
MILITARY RESPONSE.

ONLINE FRAUD CREDIT/DEBIT CARD
FRAUD,LOTTERY SCAMS

CYBER CRIME - HACKING,SIM-JACKING,SYSTEM BLOCKING

CORPORATE ESPIONAGE CYBER STALKING, NET
EXTORTION

CYBER WARFARE IN NUMBERS

440 %

30 %

27 %

Between 2009 & 2018 there was a 440% increase in global cyber warfare attacks

Nearly 30% of these attacks originated from china or russia.

27% of attacks on the U.S. occured in 2018.
